

SCIENCE CHOICE BOARD

Hello everyone! I have put together some work for you to do at home. If you have any questions for me, please contact me at carly.wilamowski772@schools.sa.edu.au

Thanks!

Miss W ☺

Year 3 Science Work

Make a model showing the way that the earth, moon and sun move around one another. Film it and send it to me.	Watch (https://www.youtube.com/watch?v=l64YwNl1wr0) and record your own definition for Rotation and Revolution. Describe how they are different.	Observe the night sky and record what you notice.
Create a board game with earth, moon and sun questions from our learning this term.	Keep a monthly 'phases of the moon' journal. Draw the moon every night.	Go to https://tinyurl.com/m68psmx and learn about constellations. Draw your favourite one.
