

192 Rock Hunt

Identify and group rocks.

STEPS

1. Go outside or to a nearby park or beach.
2. Collect six rocks, making sure they are all collected from different areas (a garden, next to a lake or from the school sports ground).
3. Write down all the differences that you can spot between all of the rocks.
4. Do you think that the different locations where the rocks were found account for any of the differences identified?

Materials

- rock collection
- pen
- paper

Did You Know?

Meteorites, which are rocks from space, help scientists learn about the solar system and are very valuable too!
